

# How Ready is Your Disaster Recovery Plan?

*Many companies don't have a plan and of those that do, 41% have never tested it.*

In today's market, a business needs to stay flexible to stay competitive. The cookie-cutter approach to Business Continuity Planning/Disaster Recovery (BCP/DR) may be a best practice for vendors, but it can mean the end for many of the best practices of their customers.

What's missing is flexibility—something Quest specializes in delivering. Don't allow your BCP/DR plans and solutions to be forced into a mold designed for somebody else's company.

## Quest Can Help You Get Prepared

Our DR experts will help you develop a disaster recovery testing plan so you're prepared for the process of returning to normal operations following a data loss or disruption. We'll work with your staff conducting onsite tests, analyze and document the results, and recommend ways to keep your DR as simple and affordable as possible while ensuring its effectiveness and compliance.
